

# Chapter 9

## SP Automation Center®

ScriptPro SP Automation Center (SPace,) is a compact robotic system that combines prescription filling, labeling, verification, and dispensing of tablets, capsules, and unit-of-use medication at one workstation. SPace organizes all dispensing steps within the operator's reach.

SPace offers an efficient, productive solution for all community and ambulatory pharmacies, including telepharmacy operations. Its unique design maximizes the amount of dispensing in a small footprint.

This chapter is intended to give a brief overview of all four available SPace configurations. The configurations are available in a back-to-back layout. A detailed description of the SP Unit Dispenser (SPUD) system can be found in the *SPUD Guide*.

This chapter includes the following topics:

- ▶ **SPace Features**
- ▶ **SPace Benefits**
- ▶ **SPace Configurations**

---

## SPace Features

---

SPace standard features include:

- Up to 200 universal medication dispensing cells
- Up to 56 shelves storing an average of 1000 products or more
- Robotic transporter
- Infeed and outfeed conveyor for storing and delivering products in SPUD
- Up to three vial dispensers handling standard pharmacy vials
- Label print/apply unit with direct thermal printer using standard label sizes
- Cell drug label printer
- Computer control system
- SP Central control software
- Uninterruptible power supply
- SP Station and control center
- Report printer

---

## SPace Benefits

---

SPace provides advanced technology that allows the pharmacy to realize numerous benefits, including:

- Lower manual dispensing costs, as much as 66% less
- Reduced dispensing errors
- Improved service during peak-demand periods
- Enhanced customer and provider satisfaction
- Increased patient counseling and other value-added health services

ScriptPro is a partner for efficiency and profitability in today's community pharmacy

---

## SPace Configurations

---

The tables below describe each SPace layout, as well as hardware used for each SPace configuration. For detailed specifications, see *ScriptPro Product Specifications* at [www.scriptpro.com](http://www.scriptpro.com).

### SP 200 SPace Options

Configuration Name	Description
<b>SPace 200</b>	Back-to-back unit with an SP 200 and a SPUD
<b>SPace Combo 200</b>	Back-to-back unit with an SP 200 and a Mini SPUD

### SP 100 SPace Options

Configuration Name	Description
<b>SPace</b>	Back-to-back unit with an SP 100 and a Mini SPUD
<b>SPace Combo 100</b>	Back-to-back unit with an SP 100 and a SPUD
